

# PROFESSIONAL SERIES SURFACE MOUNT MKII GRILLE INSTALLATION MANUAL

## FITTING AND REMOVING THE GRILLE

1. When installing the grille, align the grille trim skirt with the groove in the enclosure.
2. To lock the grille in place apply pressure at the locations of the four grille retention clips. An audible click should be heard as the grille locks into place.

**NOTE: To remove the grille, we suggest starting in any one of the four corners using a grille pulling tool (not included). Once the grille is pulled out past the retention clip in one corner, the remainder of the grille can be removed by working your hand around and lightly pulling outward, being careful not to bend the grille skirt. If the grille skirt does become bent during removal, it can be straightened by carefully bending it back into its original shape.**
