

CS-700 Extension Microphone

The Extension Microphone for the Yamaha CS-700AV and CS-700SP models allows you to extend the reach of microphone pick-up for Yamaha’s Video Sound Bar for huddle rooms.

Extended Audio Pickup

While the audio pick-up of the CS-700 is specifically optimized for people within about a radius of about 12’/3.5m, the CS-700 Extension Microphone allows you to extend that range.

Additional Mute

In addition to extending the audio pick-up range of the CS-700, the extension microphone also provides an additional mute button, allowing to easily muting the CS-700 system from the table.

Easy Set Up

The microphone simply connects to the proprietary extension microphone connector on the CS-700AV and SP models. With a 25 foot cable, the extension microphone allows you to route the wire through conduits from the microphone to the CS-700 unit.

Weight	257.5gr / 9.1 oz	Mute LED	Yes
Dimension	80mm x 76mm x 44mm 3.1” x 3” x 1.7”	RF Armour	Yes
Frequency Range	100 - 16,000Hz	Mute Attenuation	>90dB
