Direct Radiating 18 in. Subwoofer

Superb Performance, Exceptional Value

Drawing from years of experience and industry leading technologies like Complex Conic waveguides, CA/CX loudspeakers are designed to meet the needs of today's Installed-AV professionals, with a broad range of systems to provide effective solutions for every sound reinforcement challenge at competitive price points.

The new C Series subwoofers incorporate the latest components to provide clean, natural sound and tight bass response. Direct radiating designs insure the most natural response and deepest bass without coloration or resonances. All while providing unrivaled value and the natural, transparent sound that Renkus-Heinz is known for.

And as with all Renkus-Heinz products, C Series loudspeakers are backed by Renkus-Heinz's renowned worldwide customer support.

Applications

- The CX/CA118S is an 18" direct radiating subwoofer perfect for any application where, deep, tight and accurate bass is required.

- Used singly, it's the perfect match for adding sub bass to 12 & 15 inch loudspeakers and larger steerable arrays.

- In multiples, it's an impressive and powerful addition to any system requiring a powerful subwoofer.

- The standard pole socket allows loudspeakers to be easily mounted on it as a base in portable systems.

Appealing Design, Sizable Performance

The CX/CA118S was developed for applications needing a powerful, high performance subwoofer in a versatile package—at an attractive price.

It features a 4" voice coil, cast frame, treated paper cone woofer. The high-efficiency 18" woofer produces a very deep, tight bass response and the large ports insure that no chuffing or fluttering noise ever mars the sound.

A 900 watt program power rating leads to a surprisingly high 131 dB peak output level from 35 Hz to 120 Hz; the CX/CA118S is a great match to nearly any system.

Designed In Flexibility

Twelve M10 Universal Mounting Points make installation easy and clean. A 35 mm pole socket allows even large full range loudspeakers to be used in portable applications with the sub as a support. Standard recessed handles make for easy portable use and are inconspicuous in installs.

Available externally powered or with four flavors of built-in amplification; RHAON II networking, monitoring and control, and Dante digital audio, the CX/CA118S brings new levels of versatility to compact loudspeakers.

- **Eighteen-inch Woofer for Excellent Bass Response**

  Strong performance to 35 Hz.

- **Versatile**

  Recessed handles, pole adapter and UMH points are all standard.

- **Optimal Subwoofer Fidelity**

  Direct radiating design with large ports assures deep, powerful bass without coloration or port noise.

- **Available SA1250 Amplifier**

  SA1250 amplifier offers high output, full protection limiting, analog, and optional AES & Dante inputs.
